TOXICOLOGY

www.elsevier.com/locate/toxicol

Subject index of volume 192

Acute poisoning; Pesticides; Self-harm; Developing countries; IPM **192**, 249

ADR; Cytochrome P450; Polymorphism **192**, 23

Adverse drug reactions; Children; Ontogeny; Cytochrome P450; Glucuronidation **192**, 37

Allergic contact dermatitis; Protein-hapten conjugates; Xenobiotics **192**, 1

Amphibian embryo; AMPHITOX; Antioxidants; Methylene blue; Oxidative stress; Photodynamic action; Phototoxicity **192**, 211

AMPHITOX; Amphibian embryo; Antioxidants; Methylene blue; Oxidative stress; Photodynamic action; Phototoxicity **192**, 211

Androgen agonist; Enhanced OECD Test Guideline 407; Rat; Endocrine disruptors; 17α-Methyltestosterone; Apoptosis **192**, 119

Antioxidants; Amphibian embryo; AMPHITOX; Methylene blue; Oxidative stress; Photodynamic action; Phototoxicity **192**, 211

Antipsychotic response; Pharmacogenetics; Pharmacogenetic prediction **192**, 33

Apoptosis; Cadmium; Oxidative stress; Cancer; DNA repair; Gene regulation; Reactive oxygen species; E-cadherin **192**, 95

Apoptosis; Enhanced OECD Test Guideline 407; Rat; Endocrine disruptors; 17α-Methyltestosterone; Androgen agonist **192**, 119

Apoptosis; Sodium valproate; Hepatotoxicity; Caspase-11 **192**, 219

Apoptosis; Zearalenone; DNA fragmentation; Cell cycle arrest; Vitamin E; Protective effect **192**, 237

Biopersistence; Nylon respirable fibers; Man-made organic fibers; Macrophage phagocytosis; Fiber clearance; Respirable-sized fiber-shaped particulates (RFP) **192**, 189

Brain sexual differentiation; Methoxychlor; Genistein; Diisononyl phthalate; Reproductive system; Endocrine disruption **192**, 149

Cadmium; Oxidative stress; Cancer; DNA repair; Gene regulation; Reactive oxygen species; E-cadherin; Apoptosis **192**, 95

Cancer; Cadmium; Oxidative stress; DNA repair; Gene regulation; Reactive oxygen species; E-cadherin; Apoptosis **192**, 95

Cartap; Ocular lethality; Diaphragmatic injury; Rabbit **192**, 139

Caspase-11; Sodium valproate; Hepatotoxicity; Apoptosis **192**, 219

Cell cycle arrest; Zearalenone; DNA fragmentation; Apoptosis; Vitamin E; Protective effect **192**, 237

Children; Ontogeny; Cytochrome P450; Glucuronidation; Adverse drug reactions **192**, 37

Comet assay; DNA repair; Gene expression; Heme oxygenase-1; Human; Oxidative DNA damage; OGG1 **192**, 229

Comet assay; Genotoxicity; Myosmine; Tobacco alkaloids; Human target cells **192**, 171

Cytochrome P450; ADR; Polymorphism **192**, 23

Cytochrome P450; Children; Ontogeny; Glucuronidation; Adverse drug reactions **192**, 37

doi:10.1016/S0300-483X(03)00423-2

Developing countries; Acute poisoning; Pesticides; Self-harm; IPM **192**, 249

Diaphragmatic injury; Cartap; Ocular lethality; Rabbit **192**, 139

Diisononyl phthalate; Methoxychlor; Genistein; Brain sexual differentiation; Reproductive system; Endocrine disruption **192**, 149

DNA fragmentation; Zearalenone; Apoptosis; Cell cycle arrest; Vitamin E; Protective effect **192**, 237

DNA repair; Cadmium; Oxidative stress; Cancer; Gene regulation; Reactive oxygen species; E-cadherin; Apoptosis **192**, 95

DNA repair; Comet assay; Gene expression; Heme oxygenase-1; Human; Oxidative DNA damage; OGG1 **192**, 229

Drugs; Older people; Medication **192**, 49

E-cadherin; Cadmium; Oxidative stress; Cancer; DNA repair; Gene regulation; Reactive oxygen species; Apoptosis **192**, 95

Endocrine disruption; Methoxychlor; Genistein; Diisononyl phthalate; Brain sexual differentiation; Reproductive system **192**, 149

Endocrine disruptors; Enhanced OECD Test Guideline 407; Rat; 17α-Methyltestosterone; Androgen agonist; Apoptosis **192**, 119

Endothelial cells; Mercury chloride; Nitric oxide; Vasorelaxation **192**, 179

Enhanced OECD Test Guideline 407; Rat; Endocrine disruptors; 17α-Methyltestosterone; Androgen agonist; Apoptosis **192**, 119

Fiber clearance; Nylon respirable fibers; Man-made organic fibers; Biopersistence; Macrophage phagocytosis; Respirable-sized fiber-shaped particulates (RFP) **192**, 189

Gene expression; Comet assay; DNA repair; Heme oxygenase-1; Human; Oxidative DNA damage; OGG1 **192**, 229

Gene regulation; Cadmium; Oxidative stress; Cancer; DNA repair; Reactive oxygen species; E-cadherin; Apoptosis **192**, 95

Genistein; Methoxychlor; Diisononyl phthalate; Brain sexual differentiation; Reproductive system; Endocrine disruption **192**, 149

Genotoxicity; Myosmine; Tobacco alkaloids; Comet assay; Human target cells **192**, 171

Glucuronidation; Children; Ontogeny; Cytochrome P450; Adverse drug reactions **192**, 37

Heme oxygenase-1; Comet assay; DNA repair; Gene expression; Human; Oxidative DNA damage; OGG1 **192**, 229

Hepatotoxicity; Sodium valproate; Apoptosis; Caspase-11 **192**, 219

Human target cells; Genotoxicity; Myosmine; Tobacco alkaloids; Comet assay **192**, 171

Human; Comet assay; DNA repair; Gene expression; Heme oxygenase-1; Oxidative DNA damage; OGG1 **192**, 229

IPM; Acute poisoning; Pesticides; Self-harm; Developing countries **192**, 249

Macrophage phagocytosis; Nylon respirable fibers; Man-made organic fibers; Biopersistence; Fiber clearance; Respirable-sized fiber-shaped particulates (RFP) **192**, 189

Man-made organic fibers; Nylon respirable fibers; Biopersistence; Macrophage phagocytosis; Fiber clearance; Respirable-sized fiber-shaped particulates (RFP) **192**, 189

Medication; Older people; Drugs **192**, 49

Mercury chloride; Nitric oxide; Vasorelaxation; Endothelial cells **192**, 179

Methoxychlor; Genistein; Diisononyl phthalate; Brain sexual differentiation; Reproductive system; Endocrine disruption **192**, 149

Methylene blue; Amphibian embryo; AMPHITOX; Antioxidants; Oxidative stress; Photodynamic action; Phototoxicity **192**, 211

17α-Methyltestosterone; Enhanced OECD Test Guideline 407; Rat; Endocrine disruptors; Androgen agonist; Apoptosis **192**, 119

Myosmine; Genotoxicity; Tobacco alkaloids; Comet assay; Human target cells **192**, 171

Nitric oxide; Mercury chloride; Vasorelaxation; Endothelial cells **192**, 179

Nylon respirable fibers; Man-made organic fibers; Biopersistence; Macrophage phagocytosis; Fiber clearance; Respirable-sized fiber-shaped particulates (RFP) **192**, 189

Ocular lethality; Cartap; Diaphragmatic injury; Rabbit **192**, 139

OGG1; Comet assay; DNA repair; Gene expression; Heme oxygenase-1; Human; Oxidative DNA damage **192**, 229

Older people; Medication; Drugs **192**, 49

Ontogeny; Children; Cytochrome P450; Glucuronidation; Adverse drug reactions **192**, 37

Oxidative DNA damage; Comet assay; DNA repair; Gene expression; Heme oxygenase-1; Human; OGG1 **192**, 229

Oxidative stress; Amphibian embryo; AMPHITOX; Antioxidants; Methylene blue; Photodynamic action; Phototoxicity **192**, 211

Oxidative stress; Cadmium; Cancer; DNA repair; Gene regulation; Reactive oxygen species; E-cadherin; Apoptosis **192**, 95

Pesticides; Acute poisoning; Self-harm; Developing countries; IPM **192**, 249

Pharmacogenetic prediction; Pharmacogenetics; Antipsychotic response **192**, 33

Pharmacogenetics; Pharmacogenetic prediction; Antipsychotic response **192**, 33

Photodynamic action; Amphibian embryo; AMPHITOX; Antioxidants; Methylene blue; Oxidative stress; Phototoxicity **192**, 211

Phototoxicity; Amphibian embryo; AMPHITOX; Antioxidants; Methylene blue; Oxidative stress; Photodynamic action **192**, 211

Polymorphism; Cytochrome P450; ADR **192**, 23

Protective effect; Zearalenone; DNA fragmentation; Apoptosis; Cell cycle arrest; Vitamin E **192**, 237

Protein-hapten conjugates; Allergic contact dermatitis; Xenobiotics **192**, 1

Rabbit; Cartap; Ocular lethality; Diaphragmatic injury **192**, 139

Rat; Enhanced OECD Test Guideline 407; Endocrine disruptors; 17α-Methyltestosterone; Androgen agonist; Apoptosis **192**, 119

Reactive oxygen species; Cadmium; Oxidative stress; Cancer; DNA repair; Gene regulation; E-cadherin; Apoptosis **192**, 95

Reproductive system; Methoxychlor; Genistein; Diisononyl phthalate; Brain sexual differentiation; Endocrine disruption **192**, 149

Respirable-sized fiber-shaped particulates (RFP); Nylon respirable fibers; Man-made organic fibers; Biopersistence; Macrophage phagocytosis; Fiber clearance **192**, 189

Self-harm; Acute poisoning; Pesticides; Developing countries; IPM **192**, 249

Sodium valproate; Hepatotoxicity; Apoptosis; Caspase-11 **192**, 219

Tobacco alkaloids; Genotoxicity; Myosmine; Comet assay; Human target cells **192**, 171

Vasorelaxation; Mercury chloride; Nitric oxide; Endothelial cells **192**, 179

Vitamin E; Zearalenone; DNA fragmentation; Apoptosis; Cell cycle arrest; Protective effect **192**, 237

Xenobiotics; Allergic contact dermatitis; Protein-hapten conjugates **192**, 1

Zearalenone; DNA fragmentation; Apoptosis; Cell cycle arrest; Vitamin E; Protective effect **192**, 237
